Ontario Influenza Bulletin
2006-2007 Season

SURVEILLANCE WEEKS 51 and 52 (December 17 - December 30), 2006

This issue of the Ontario Influenza Bulletin provides information on the surveillance period from December 17 - December 30, 2006 (weeks 51 and 52). The analysis for this issue occurred on Wednesday January 3, 2007, therefore all data is current to that date unless otherwise specified.

Influenza activity in Ontario during weeks 51 and 52, 2006, was greater compared to the previous week. Ninety sporadically occurring cases of influenza A and one case of influenza B were reported through iPHIS from health units, while 4 new institutional influenza A outbreaks were reported. The Central West health and Toronto regions reported 'localized' influenza activity; Central East, Eastern and Southwest regions reported 'sporadic' activity, while remaining regions reported 'no activity' levels.

For a definition of influenza-like illness (ILI) activity levels and links to websites providing current influenza information from other sources, please refer to the attached Appendix- I. If you would like to provide feedback on the Bulletin, please contact Michael Whelan (michael.whelan@moh.gov.on.ca , 416-327-9174) or Anne-Luise Winter (anne-luise.winter@moh.gov.on.ca, 416-327-7301).

Table 1: Summary of laboratory-confirmed influenza cases and institutional influenza outbreaks by health region, December 17 - December 30 (weeks 51 and 52), 2006.

Lab-confirmed Influenza cases*	HEALTH REGION							TOTAL
	North West	North East	Eastern	Central East	Toronto	South West	Central West	
Influenza A	0	0	1	12	10	3	64	90

* Cumulative case counts include late reports and records that are otherwise reconciled. Therefore, cumulative counts may not equal new cases plus previous cumulative value.

† Episode Date for a case corresponds to the earliest date on record for the case according to the iPHIS hierarchy (Symptom Date > Clinical Diagnosis Date > Specimen Collection Date > Lab Test Date > Reported Date)

Ontario Influenza Bulletin, 2006-2007
Surveillance Weeks 51 and 52, between December 17 - December 30, 2006

Influenza Subtype(s):

During week 51, 2860 isolates were received by the Public Health Agency of Canada, with a total of 167 testing positive for influenza A and 3 for influenza B. The majority of influenza A isolates (112) were from Alberta (67.1%), while there were 42 (25.1%) from Ontario, 5 (3.0%) from Saskatchewan, 2 (1.2%) from Quebec and 6 (3.6%) from British Columbia. Of the 3 influenza B isolates, 2 came from Quebec and 1 from British Columbia.*

Antigenic Characterization:

The National Microbiology Laboratory (NML) has characterized 74 influenza viruses for the 2006-2007 influenza season: 27 were A/Wisconsin/67/05(H3N2)-like, 45 were A/New Caledonia/20/1999(H1N1)-like, 1 B/Malaysia/2506/2004-like, and 1 B/Shanghai/361/2002-like. All but the B/Shanghai/361/2002-like strain are included in the composition of the 2006-2007 Canadian influenza vaccine. Of the influenza A viruses characterized, 98% (44/45) of the A(H1N1) viruses were from the West and 96% (26/27) of the A(H3N2) viruses were from Ontario.**

Antiviral Resistance:

Since the start of the season, the NML has tested 38 influenza A isolates (17 H1N1, 21 H3N2) for amantadine resistance. None of the H1N1 isolates tested were resistant to amantadine; however, 19% (4/21) of the H3N2 isolates were resistant. Of the 56 influenza A isolates tested for oseltamivir resistance, none were found to be resistant.**

Note: Based on the World Health Organization recommendations, Canada's National Advisory Committee on Immunization (NACI) recommended the **2006-2007** influenza vaccine contain an **A/New Caledonia-like**, an **A/Wisconsin-like** & a **B/Malaysia-like** virus strain.

* These data have been obtained from the Respiratory Virus Detection tables of Public Health Agency of Canada for week 51, 2006.
** These data have been obtained from the FluWatch report of the Public Health Agency of Canada for week 51, 2006.

APPENDIX - I

Definitions for influenza activity levels:

No Data: No activity report corresponding to the surveillance week was received at the Ministry of Health and Long-Term Care Call Centre by the Tuesday (at 4 p.m.) following the end of the surveillance period.

No Activity: No laboratory confirmed* influenza cases(s) or outbreak detected during the past four weeks within the influenza surveillance region, however, sporadically occurring **ILI** may be reported†

Sporadic: Sporadically occurring **ILI and laboratory confirmed influenza* case(s) with NO outbreaks** detected within the influenza surveillance region†

Localized: sporadically occurring **ILI and laboratory confirmed influenza* case(s) together with outbreaks of ILI** in schools and/or worksites or laboratory confirmed influenza in residential institutions occurring **in less than 50% of the influenza surveillance region(s)**†

Widespread: sporadically occurring **ILI and laboratory confirmed influenza* case(s) together with outbreaks of ILI** in schools and/or worksites or laboratory confirmed influenza in residential institutions occurring **in greater than or equal to 50% of the influenza surveillance region(s)**†

* Confirmation of influenza within the surveillance region at any time within the prior week
† Sub-regions within the province or territory as defined by the provincial/territorial epidemiologist

Influenza-Like Illness (ILI) Definitions:

A) ILI in the general population:

Acute onset of respiratory illness with fever and cough and with one or more of the following - sore throat, arthralgia, myalgia, or prostration which could be due to influenza virus. In children under 5, gastrointestinal symptoms may also be present. In patients under 5 or 65 and older, fever may not be prominent.

B) ILI/Influenza outbreaks:

Schools and work sites: greater than 10% absenteeism on any day, most likely due to ILI.

Residential institutions: two or more cases of ILI within a seven-day period, **including at least one laboratory-confirmed case**.

Influenza Surveillance Weeks 2006-2007 and date of submission of Appendix C
